

Hydro Therapy

More buoyant and comfortable, the Hydro is an amphibious addition to the wildly popular **CROCS** family, equally adapted to landlubbing activities and water sports. The distinctive, stretchable drawstring topline secures the shoe to the foot and functions as a mini-flipper underwater, and once on land, the water drains away rapidly through the trademark holes of Crocs shoes. Available in four different colours, black, pearl white, khaki and sea blue.

Available at CROCS, #03-134 Marina Square, T: 6337 0134
